

Statistica Product Bundles

Find the edition that's right for you.

As the global need for traditional data scientists outpaces the available supply, citizen data scientists—everyday, nontechnical users embedded in the line of business—will increasingly become the driving force behind analytics initiatives. In addition, with distributed data repositories and a huge surge in data volumes from the Internet of Things (IoT), streaming and real-time sources of data, organizations must analyze faster and smarter to stay one step ahead.

Statistica helps solve these challenges with new key features, such as Collective Intelligence, Citizen UI and Edge Analytics. These new features enable you to empower your citizen data scientists, experience native integration with application marketplaces and open source languages, and distribute data preparation and analytic workflows to any edge device or gateway—anywhere in the world.

CHOOSE THE STATISTICA BUNDLE THAT'S IDEAL FOR YOU

Professional — For citizen data scientists who understand the value of data, and need simplified data prep, analytics and dashboards.

Expert Manufacturing — For manufacturing/industrial engineers who aren't programmers, but use analytics for quality control, SPC, process monitoring and process optimization.

Expert Data Science — For data scientists or statisticians who may or may not be programmers, but need machine learning, python and R scripting, and reusable templates.

Enterprise — For executives and managers who typically apply analytics to run their businesses and make strategic decisions.

"The bundling of Statistica's features helps you take control of the analytics that are the right fit for your unique business needs."

Capability	Professional	Expert Manufacturing	Expert Data Science	Enterprise
Empowering data scientists and citizen data scientists				
Simplified data prep, mash-up and aggregation	X	X	X	X
R and Python scripting	X	X	X	X
Time-stamped and/or batch-stamped data mash-up capability		X	X	X
Web-based access to view and run workflows*		X	X	X
Automatic model building			X	X
Enabling collective intelligence				
Integration with app markets (Azure ML, Apervita and Algorithmia)	X	X	X	X
Integration with Microsoft® Cognitive Toolkit	X	X	X	X
Model management and version control*		X	X	X
Reusable workflow templates*		X	X	X
Big data analytics (Native Distributed Analytic Architecture)				
Integration with H2O (Spark on Hadoop)*			X	X
In-database data prep, model build and scoring*				X
Edge Analytics for IoT				
Deploy data prep and analytic workflows on edge devices and gateways*				X
Real-time data discovery and reporting				
Streaming data visualizations, dashboards and discovery	X	X	X	X
Standardized reports for regulated industries*		X	X	X
Analytics				
Descriptive statistics, forecasting, regression and exploratory data analysis	X	X	X	X
Quality control, multi-variate SPC and design of experiments	X	X	X	X
Machine learning, data mining and automated neural networks			X	X
Analyze research designs with both fixed and random effects		X		X
Deep learning*			X	X
Text mining*				X
Network (entity) analytics and automated model building*				X
Deployment options				
Batch scoring*			X	X
Model deployment code generation (PMML, Java, C#, SQL and SAS)				X
Business rules builder (conditional execution of models and rules, if/elseif/else)		X	X	X
Real-time monitoring and alerting*		X	X	X
Real-time live scoring*				X
Compliance, security and governance				
User/role-based security, audit trails, version, approvals and electronic signatures*		X	X	X
Validatable analytics and reporting for regulated industries* (FDA CFR Part 11, IHC, SOX and Basel II)		X	X	X
Industry-specific analytic add-ons				
OSI PI connector		X		X
Validated data entry*		X	X	X
Stability and shelf-life analytics*				X
Product traceability analytics*				X

* Requires server

ABOUT STATISTICA

Statistica's big data, advanced analytics and IoT offerings provide you endless possibilities to innovate your enterprise. Whether it's uncovering the genetic basis of a disease, reducing hospital readmissions, mitigating financial risk, or ensuring procedural validation, Statistica enables organizations to transform in new and exciting ways. By embedding analytics everywhere and empowering a wider community of citizen data scientists, you'll accelerate innovation, improve patient experiences, and streamline your enterprise for the future.

Statistica
